

Liquor Customer Self Service

CSS Release Update – Effective December 9, 2022

Shopping Cart Enhancements

Based on user feedback, new columns have been added to Shopping Cart to display:

- Distributor of product ordered
- Case Qty (product is ordered in Eaches, but this column will display conversion to Cases based on units per case)
- Units per Case

Providing this information will assist Customers in seeing which Distributor their product is coming from along with the number of cases for each Distributor to determine if the order meets minimum order requirements for delivery. Once Customers can see their totals ordered, they can then adjust their order to ensure proper order quantities are met for delivery and for Distributor delivery fees. Orders can be revised and repriced over again to verify if delivery fees are removed.
